COMPANY PROFILE

PT. Aneka Dasuib Jaya began its business journey by producing graviola leaves, noni, fingerroot, and various other spices. In 2021, we expanded our operations into the sauce, seasoning, and food ingredient industries, partnering with franchise companies to supply high quality raw materials.

In June 2021, we made our first import of seaweed (nori) products. Our nori range includes several varieties, such as sushi nori, onigiri nori, kizami nori, seaweed snacks, and nori seasoning. With the support of a skilled and professional workforce, by September 2021 we successfully entered the market, rapidly establishing a strong presence in the seaweed (nori) segment. We consistently prioritize customer satisfaction by delivering products that are high quality, Halal, hygienic, practical, and affordable.

All our products are certified by the Indonesian Ulema Council (MUI) and the Indonesian Food and Drug Authority (BPOM RI), ensuring safety and reliability for consumers nationwide. In 2024, we achieved Hazard Analysis and Critical Control Points (HACCP) certification, enabling us to expand our reach to markets beyond Southeast Asia.

By the end of 2024, Hana Katsuobushi, Katsuodashi, and Matdashi were launched, marking a new milestone for the company. Hana Katsuobushi, made from premium-quality skipjack tuna through a meticulous process, began export to South Korea with expansion plans to Japan and other regions including Asia, North America, and Europe.

Our products have already been exported to Saudi Arabia, South Korea, Malaysia, the Philippines, Singapore, and Taiwan, and we are ready to further expand our market beyond Southeast Asia. By 2025, we aim to grow our international presence and introduce our products to more countries while maintaining our commitment to quality, affordability, and customer satisfaction.

In 2026, our head office targets to obtain BRC and FSSC 22000 certifications. These global recognitions will strengthen our position to expand exports to European markets.

Additionally, we are in the process of obtaining retort food production licensing for ready to eat meals. Through this development, we plan to launch more than 30 traditional Indonesian dishes, including Sambal, Rendang, Beef Ribs Soup, and many others.

With these advancements, PT. Aneka Dasuib Jaya continues to strengthen its position as a professional processed food manufacturer in Indonesia expanding both its domestic and global market presence.
